**DATE: 20 June 2001**

**ISSUE: 120**

**SUBJECT: Magnetic Door Spacers**

To assist you in making sure that you have the proper spacing on the inner cold food door on the 429 Food King, we have developed a set of magnets which will help you achieve this spacing. The only time you should need these magnets should be if you have to remove the inner door for some reason, or if you should have to replace the magnetic gasket due to gasket roll and improper sealing.

There are two sizes of magnets, and two of each size is required to properly make the adjustment. The part numbers for these magnets are; 1479119 and 3122056. Please contact the parts department at 800-621-7278 to place your order. **REMEMBER!** You need two of each magnet.

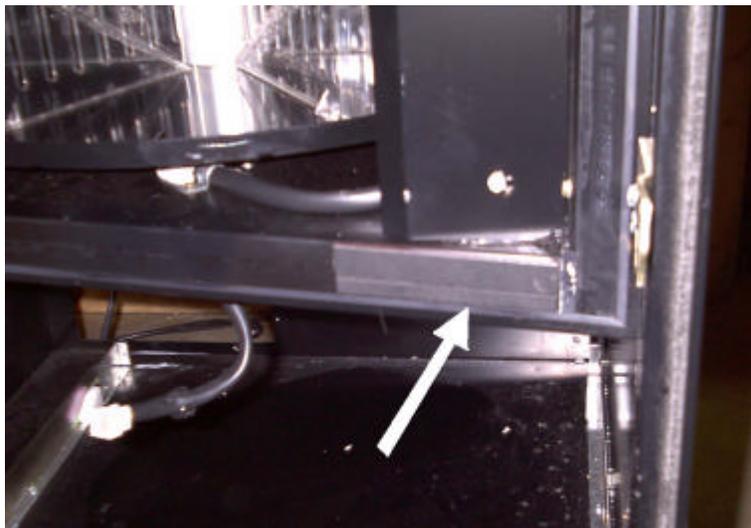

The following pictures should aid you in making door adjustments. If you have any questions please feel free to contact us.

**Gerald Widener**  
**GPL Field Service Engineer**

**Attach Magnetic Gauge on the top of the mating strip as shown. This photograph displays magnetic strip attached for the right mating surface; the left side is attached in the same manner.**

---

**Install the larger magnetic gauges on the bottom gasket mating surfaces as shown**
