

# MDM FD7 Series

# MDM FD7 Series

## A Tasteful Choice

The Model MDM FD7 freeze-dried vender offers customers seven big choices—four selections of coffee, three coffee extras, one decaffeinated coffee or tea, one whipped hot chocolate and one soup (or other selection).

The MDM FD7 is compact. But don't let the size fool you. It's specially designed for high volume areas.

And it offers the most consistent cup of coffee on the market. And that consistency translates into big profits for you.

## Superior Technology

Very little of that profit will be spent on routine maintenance. That's because the MDM FD7 features a special, stainless steel, teflon-coated mixing bowl which requires considerably less cleaning than traditional mixing bowls.

In fact, the MDM FD7 requires sanitizing only once every three months, compared to the usual interval of once each week for traditional machines.

The MDM FD7 also features a special "jam-proof" cup dispensing system.

Precision-timed motors start when they're supposed to and stop when they're supposed to, helping assure a consistent cup every time.

## Customer Convenience

A one-handed delivery door assures easy retrieval of the products from the machine. Easy-to-read eye level selections are convenient for customer use. Illuminated "Temporarily Out Of Service" light avoids customer inconvenience.

## Easily Maintained

The MDM FD7 Series is designed for easy location maintenance. A full 2 year warranty helps keep maintenance costs low.

Plus it is a serviceman's dream: A machine designed to be as easy to understand as it is to fix.

A one-handed delivery door operation provides comfortable performance.

## MDM FD7 Specifications
