

DMV TOP RAMP COVER FOR CAN VENDING

M005.0

Reason: To provide a kydex cover to enhance can loading.

Order 2 per module: 594,071,130.03 Ramp Cover (Cans)

To install:

1. Ramp covers only need to be installed on top ramp.
2. Carefully lift the center divider until the locator tab is high enough to place the first ramp cover in position on the right side of the center divider. The tab of the center divider should go through the second slot (A) from the left end of the ramp cover.
3. Carefully lift the center divider until the locator tab is high enough to place the second ramp cover in position on the left side of the center divider. The tab of the center divider should go through the second slot (A) from the right end of the ramp cover.
4. The locator tab of the center divider must still be in slot #10 (A) of all the ramps to ensure proper can vending.
