MPC VENDERS - BILL VALIDATOR ESCROW MODES

Most of the MPC venders currently in the field have the following bill escrow mode when the vender is in the escrow to select mode:

<u>Vend Price</u>	<u>Mode</u>	<u>Effect</u>
0.05 - \$1.00	No Escrow	All accepted bills are stacked. The vender functions as a bill changer.
\$1.05 - 9.95	Last Bill Escrow	Will stack all bills accepted except the last bill required to meet or exceed the maximum vend price which will be held in escrow.

Due to requests from the field, an EPROM has been developed that will provide selectable bill escrow modes at any vend price when the vender is in the escrow mode. These modes are as follows:

No Escrow	All bills will be stacked	Vender will function as a bill changer.
Last Bill Escrow	Will stack all bills accepted except the last bill required to meet or exceed the maximum vend price which will be held in escrow.	Vender will not function as a bill changer at vend prices of \$1.00 or less.

To order the new EPROM, call or fax the order to the Eastlake Parts Department and order part number 57x363-10. Please specify which programming instruction label you require; one will be provided with each EPROM.

Program Instruction Label Part Number

<u>Style</u>	<u>Ardac</u>	<u>Dixie-Narco</u>
Pepsi	80x927	803,829,53x.x1
Coke	80x928	803,829,54x.x1
All others	80x929	803,829,55x.x1
